

Setting Up StudentVUE

Principals, Office Managers & Counselors all have access to set up or re-set StudentVUE accounts.

To set up student accounts, go to **StudentVUE**, search for your student, enter the **User ID/Username, Password, Confirm Password** and **Save** the new account settings. Then email the student the sample student email with their login credentials.

When setting up student accounts we are now standardizing the UserID/Username and Password as follows:

Standard User Name: your username is the first part of your school email, not including the @g.k12espanola.org. Please note, user names are case sensitive.

Standard Password: your password will be your Student ID Number

Sample Email:	myra.m1234@g.k12espanola.org
Sample StudentVUE Username:	myra.m1234
Sample Password:	123456789 (this is your Student ID Number)

Students who need support with their StudentVUE account should seek assistance from the school office support team, counselor, or building administrator.

Accessing StudentVUE

Office staff have reset all Usernames and Passwords for inactive StudentVUE accounts. They have emailed User Names/Passwords to all student email accounts. Please check your school email account for StudentVUE login credentials and login to “Activate” your account.

Option 1: Students may access their **StudentVUE** account through a web based browser, using their district issued device or personal computer, available at:

Login Link: https://nm-espd55.edupoint.com/PXP2_Login.aspx

The login quick link is also available on the **Student/Parents** Quick links on our district homepage available at www.k12espanola.org.

Option 2: Students may also download the **Synergy StudentVUE app** on their personal devices from the **Apple Store** or **Google Play**. Once downloaded students can then link to **Espanola Public Schools** (enter Zip code 87532 to search and link) and login utilizing their provided Username/Password.
